Commentary:

Q2 2022 saw 397 claims handled by CIGA, a large decrease of 32% compared with the level experienced in Q2 2021.

Water Penetration accounts for roughly 40% of claims being received and 12% accounted for claims where the homeowner made contact with CIGA but held no CIGA guarantee.

In Q2 CIGA successfully resolved 362 claims with 3 claims going through the arbitration process. Of these 3, 2 were published whilst the other 1 is still going through the process. Of the 2 awards published both claims failed. Referrals to arbitration continue to be low. CIGA has made adjustments to its processes/procedures based on award decisions and a stringent internal case review process is in place before cases are referred to arbitration.
