Commentary:

Q3 2023 saw 334 claims handled by CIGA, a decrease of 7.4% compared with the level experienced in Q3 2022.

Water Penetration accounts for roughly 45.5% of claims being received.

In Q3 CIGA successfully resolved 448 claims. This was due to the increase that we had over Q4 2022 and Q1 2023. 7 claims are going through the arbitration process. Of these 7, 3 are still going through the process, the other 4 have been published. Referrals to arbitration continue to be low. CIGA has made adjustments to its processes/procedures based on award decisions and a stringent internal case review process is in place before cases are referred to arbitration. 123 enquiries from Q3 are still awaiting further information prior to confirming the complaint type.
